AKTIVITAS MANDIRI 2 — Membuat Routing & Controller Dashboard

1. Buat Controller DashboardController: php artisan make:controller DashboardController

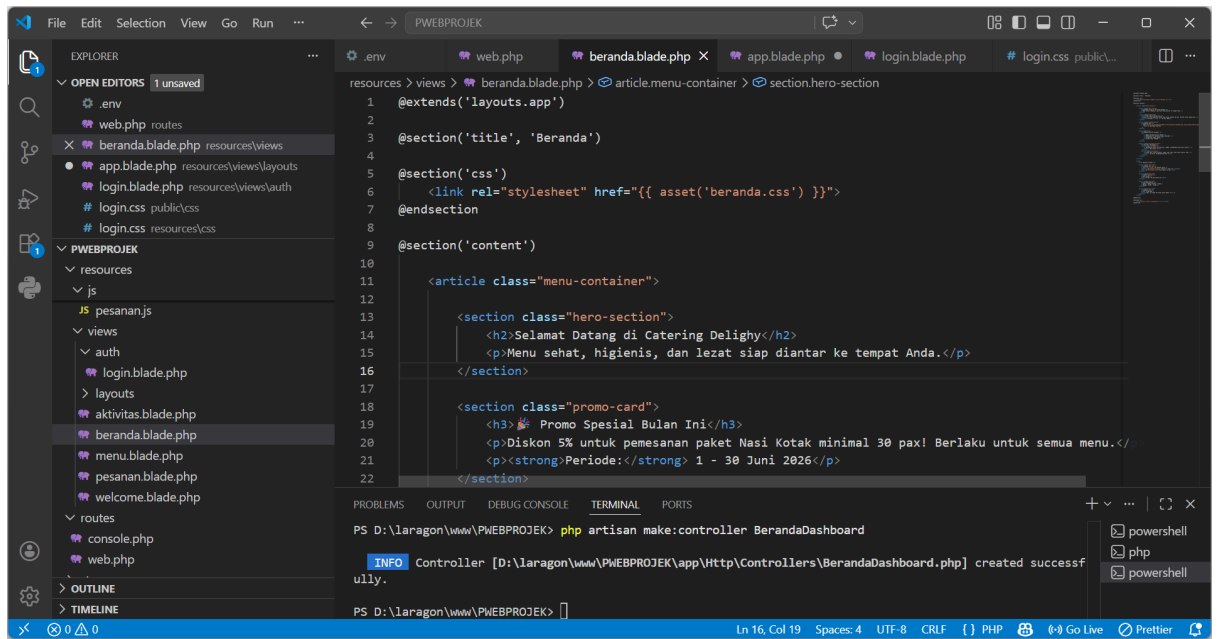

2. Tambahkan method index() yang mengembalikan view('beranda') di Beranda Controller

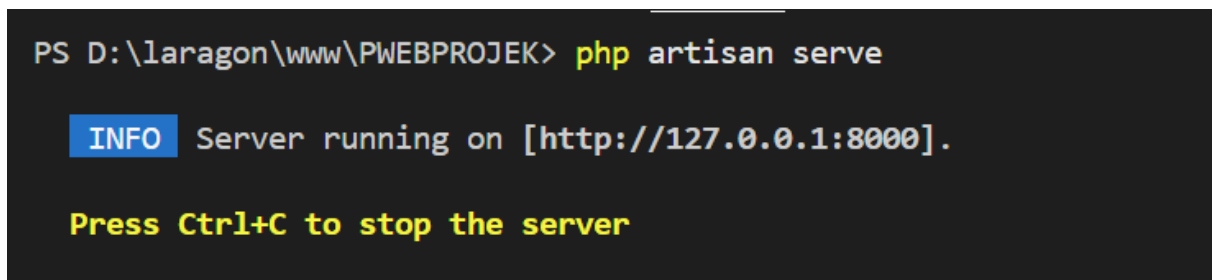

3. Daftarkan route di routes/web.php: Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard')

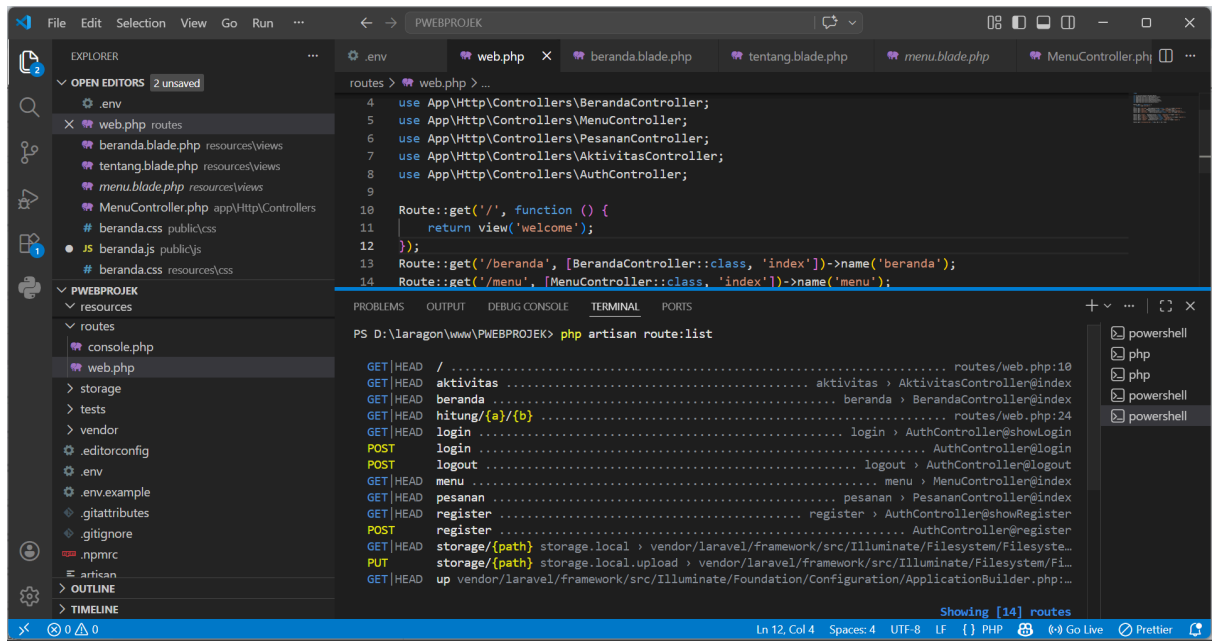

4. Buat file resources/views/dashboard.blade.php

5. Akses <http://127.0.0.1:8000/dashboard> di browser — pastikan tampil

6. Buat route /tentang dengan `Route::view('/tentang', 'tentang')` dan buat view-nya
 - Pada proyek Delighy penulis memang tidak terdapat “Tentang” sehingga tidak dapat mencantumkan ataupun membuat.
7. Jalankan `php artisan route:list` — amati semua route yang terdaftar

8. Coba buat `Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b)` dan akses `/hitung/10/25`
